

# Kinspace Tablet User Guide

Simple instructions for using the family tablet at home.

## What this guide covers

- Start with Kinspace sign in
- Choose the family member for this tablet
- See today's tasks
- Move to another day
- Complete or uncomplete tasks
- Add a new to-do
- Start and finish a timer
- Review or change settings

## How to use this guide

- Start on Home to see the current day.
- Use Add To Do to create tasks with due dates and timers.
- Use the Timer screen when a task has a saved duration.
- Use Settings to protect changes and manage editing.
- Use Troubleshooting if the tablet and cloud get out of sync.

## Onboarding and Kinspace Cloud Login

The first launch uses Kinspace Cloud to sign in, then chooses who the tablet belongs to.

### How to use this screen

- Tap Sign in with Kinspace on the first screen.
- Complete the Kinspace Cloud login in the browser flow.
- If the tablet has not been assigned yet, choose the family member who uses this tablet.
- That selection saves the tablet's member and household so the Home screen can load the right tasks.
- If you ever need to change who the tablet belongs to, Settings can reset the assignment and send you back through setup.

## Home Screen

This is the main screen families use every day.

### How to use this screen

- The top bar greets the active family member.
- Use the date controls to move between days.
- Tap Pick date to jump directly to any date.
- Tap Today to return to the current day.
- Tap the red circle to mark a to-do complete or uncomplete.
- Tasks with timers show a Start button.
- If editing is enabled in Settings, Edit and Delete buttons appear on the task card.
- Past days are completion-only, so you can review history without changing the task itself.

Home shows today's tasks, progress, and day navigation.

## Add To Do

Use the Add To Do screen to create a new task for a family member.

### How to use this screen

- Tap the purple + button on the Home screen to start a new to-do.
- Enter a title first.
- Tap the due date row to open the calendar picker.
- Leave the due date blank if the task should count for today.
- Choose the todo group and repeat options from the native pickers.
- Timer minutes and seconds use native number pickers.
- Minutes and seconds can both be 0.
- Tap Save To Do to save the item and sync it to the cloud.

The add form uses native pickers for date, group, repeat, and timer values.

## Timer Screen

Start a timer when a task has a saved time allowance.

### How to use this screen

- Tap Start on a task that has a timer.
- Use Pause / Resume to stop and restart the countdown.
- Use Complete To Do to mark the task complete from the timer view.
- Use Reset Timer to restart the timer from the beginning.
- Use Cancel to leave the timer without completing the task.
- When the timer ends, the tablet plays the selected alarm sound and stays on the timer screen until the user leaves it.

The timer screen keeps the user in control until they finish or cancel.

## Settings Screen

Settings are protected so changes can be controlled.

### How to use this screen

- Settings can be locked with a 5-digit passcode.
- If Settings are locked, enter the passcode to unlock them.
- Use Reset via Cloud if the passcode is forgotten.
- The Behavior section controls the daily reset time and auto-logout timeout.
- The edit/delete todo toggle controls whether task cards can be changed or removed.
- After leaving Settings, the passcode lock is restored the next time the screen opens.

Settings includes the passcode lock and behavior controls.

## Editing and Deleting To Dos

Turn on the setting first, then use the buttons on each card.

### How to use this screen

- Open Settings and unlock them first if needed.
- Turn on the Allow edit/delete To Dos setting.
- Go back to Home to see the Edit and Delete buttons on each task card.
- Edit changes the task details and saves the update to the cloud.
- Delete removes the task entirely and syncs the removal to the cloud.
- If the setting is off, the buttons stay hidden.

Edit and Delete appear on Home when the setting is enabled.

## Passcode Recovery

If the passcode is forgotten, the tablet can be reset through cloud login.

### How to use this screen

- Go to Settings.
- Tap Reset via Cloud.
- Sign in to Kinspace Cloud.
- After successful cloud login, set a new 5-digit passcode on the tablet.
- This keeps the tablet protected without losing access permanently.

**Reset via Cloud is the recovery path when the local passcode is forgotten.**

## Troubleshooting

A few quick fixes for common issues.

### What to try first

- If a new to-do does not appear, tap the refresh icon on Home.
- If the cloud and tablet disagree, refresh Home again after a moment.
- If Settings are locked, use the passcode or Reset via Cloud.
- If a task has no Start button, it does not have a saved timer.
- If you are looking at a previous day, only completion changes are allowed.
